Varying Styles in Beards. Beards have been associated more or less with age. "Gray beards" find no equivalent in "brown beards" or "black beards," and there is but one "Bluebeard." A modified beard once popular in the United States and typical of Uncle Sam is the goatee. Of a somewhat similar character is the short beard, trimmed to a point, which is usually accompanied by an "imperial" or tuft just under the lower lip, as worn by Napoleon III. They had a habit once of wearing the beard moderately long and cut to separate half-way and finish in two tassels. Reversing this process, English farmers shaved both lips and chin, which left a vacant space almost surrounded by a vacant space almost surrounded by a vacant space. A similar clearing existed in a fashion of some centuries ago, except that the mustache was worn.

The ladies of the Presbyterian Church will serve tea in the church parlors Thursday, January 15, from 5:30 until all are served. 50 cents. 32w2

**Is Every Animal
At Its Best?**

Don't let your stock lose their Summer's gain through November neglect. Your animals are now going on dry feed—hay and grain. It's a big change from the succulent, nutritious grasses of summer pastures which supply the needed laxatives and tonics. Keep your animals' bowels open and regular—drive out the worms—keep their blood rich and keep their digestion good by feeding regularly.

**Dr. Hess Stock Tonic
A Conditioner and Worm-Expeller**

Don't allow your stock to "get off feed" and in a run-down condition. Condition your cows for calving by feeding Dr. Hess Stock Tonic before freshing. Then feed it regularly to increase the flow of milk. It lengthens the milking period. Buy Stock Tonic according to the size of your herd. Get from your dealer two pounds for each average hog, five pounds for each horse, cow or steer, to start with, feed as directed and then watch results.
