WEDNESDAY, MARCH 24, 1920.

WOOD AND THE TREATY.

To nominate Leonard Wood at Chicago would be to repudiate the leadership of Senator Lodge in the League of Nations. The League of Nations is to be approved and sustained, logic and consistency point unerringly to Hiram Johnson as the man to be nominated by the Republicans.

Col. Roosevelt used to characterize such statements by what he called the "short and ugly word." There is, however, no need to dignify the Wilson brand of propaganda with a denial. It is as easily recognized and as promptly discounted as the German brand. In the same issue of the Times we find the following reiteration of its own editorial words:

"Not the least interesting of General Wood's opinions is the one relating to the League of Nations. He is strongly for the League with the Lodge reservations. He says:

"I believe that we should accept the League of Nations as modified and safeguarded by the existing League reservations—reservations that Americanize it and safeguard our traditional policies, reservations which leave America absolutely free and untrammelled to follow the will of her own people in all questions of foreign and domestic policy."

CAN YOU BEAT IT?

"Mr. Wilson's management of foreign relations of the country during these years of trouble has been marked by extraordinary ability, by a genius for discerning and declaring sound principles, by an unequalled power to state clearly the right rules of conduct for nations, and by a sincere devotion to justice and fair dealing."

Some of our business men talk of re-joining specie payments.

A serious accident occurred on the R. W. & O. Wednesday 3 miles south of Gouverneur. The rear car of the train which reaches here at 12:20 ran off the track, upset, and rolled into the ditch. It contained about forty passengers, a dozen or more of whom were injured, some seriously. The cause of the accident was attributed to the spreading of the rails.

MUNICIPAL BOARD.

(Continued from Page 1.)
ally driven pump ordered last December is expected in a few weeks. An effort will be made the coming summer to install a new flume and settling basins at the pumping station. A new iron main to replace old wooden mains will be placed beneath the New York Central tracks at Walnut street. 330 feet of new main was laid in Hamilton street at a cost of \$91.48 per foot. Considerable extension work will be done the coming season as authorized at the election early last fall. These extensions include the May Road, Barclay street, and Lawrence avenue.

A REPORT ON SUGAR.

The average citizen is not much concerned with the details of the reports of large corporations of the country, but that of the American Sugar Refining Company, just issued, is of more than ordinary interest and it furnishes some food for thought. The report says that the Company made a profit this year of \$18.93 per share on its common stock, this in addition to dividends on the preferred stock. Last year, the earnings on the common stock were \$11.60.

"The outstanding feature of the year," continues the report, "was the increase in the consumption of sugar in the United States of over 16 per cent. A total of four million tons was reached for the first time." A great many people will wonder who, in view of the long period when little or no sugar could be had, managed to get sufficient to run the total consumption up to over four million pounds. It will be a matter of speculation to other, in view of the nice profit made last year with prices comparatively low, how much the profit will be this year with sugar selling at upwards of 5 cents per pound higher. Interesting questions aren't they?

Newspapers are getting decidedly tired of listening to one and the same man in the state vilas. It has been said that "sticks and stones may break my bones—but names will never hurt me." However, there is a limit to matter what the cause may be. In the long run rough stuff and tongue-thuggery act as a boomerang on the one who would resort to this practice.

Even the "solid south" is getting somewhat anti-Wilson, judging from the declarations of some of the Democratic leaders from south of the Mason Dixon line. No one can assume to be the whole thing and

get away with it for any length of time. Strange as it may appear the people will not stand for it no matter who the man may be.

Four hundred three thousand dollars seems like quite a bit of money to build thirteen miles of highway, but there is little question but that, when completed, the Potsdam-Winthrop road will be the finest anywhere in this part of the state. It will serve a very rich farming section and this community should benefit immeasurably by its construction.

Take part in the primaries and you will be doing something worth while. There is nothing more important in the election system than the primaries and the people should take an interest in them. If you fail to attend the primary you can have no valid complaint over what was done.

The Ogdensburg Common Council has passed a Ordinance Saving Ordinance. Presumably the Council has some plan by which it will enforce the measure, but it would seem that the difficulties would be insuperable.

Many friends of Clarkson and St. Lawrence, especially in this section, will hope that the recent rumors of a resumption of athletic relations between the two institutions are not without foundation.

The opening of the rural highways to motor travel again, furnishes some relief from the deplorable lack of service under present railroad schedules.

HALF A CENTURY AGO

Taken From Courier and Freeman Files March 24, 1870.

Married in Nicholville, March 16, 1870, at the residence of W. S. Taggart, by Rev. J. W. Grush, Henry H. Sweet of Nicholville to Miss Myra A. Learned of Dickson.

At a meeting of the St. Lawrence County Agricultural Society lately held, it was voted to raise all classes of premiums at least fifty per cent and some more than that.

The appropriation bill which passes the House of Representatives on the 16th inst., gives \$5000 for paving, grading and fencing the grounds of the Custom House, Ogdensburg.

The Baptist Society of Malone have resolved to build a new church the coming summer at a cost of \$18,000 or \$20,000.

Messrs. Eastman and Johnson have purchased the Winkinson Store where they are now located, for \$5,000.

Some of our business men talk of re-joining specie payments.

The Club Garage.

Millinery Opening.
Jane Harrington will have her Millinery Opening, Thursday and Friday, March 25 and 26. All are cordially invited. 43w1

CHEVROLET

You'll be surprised how little it costs to operate a "Chevrolet 490."

Twenty five miles on a gallon of gasoline is not unusual. Tires last a long time. Repairs are few and far between.

It is a hands-on, roomy, comfortable car, one you can be proud to own.

H. I. Van Ness
14 Main Street.

The Cash Hardware Co.

At considerable expense have arranged for the DEMONSTRATION explained below. It will be held during

The Week Commencing March 29th and will be of great interest to our farmer friends as well as to all users of tools.

Did You Ever Sharpen a Shovel?

Not very often, have you? There are so many other things to sharpen that you never get to it. You haven't time. Those "other things" take too long.

But when you have a Luther Hammer Tool Sharpener the "other things" take such little time and work that it's easy to keep everything on the place sharp all the time. Now that doesn't jibe with your past recollections of tool sharpening jobs, does it? Well, the Hammer sharpens tools in the new way—the way they do it in machine shops, factories, shipyards, etc.

It's a real machine with ball bearings, worm gear drive and all-steel construction. You sit on it and pedal. No one needs to turn it for you, fellow can be doing something else. It is equipped with Dime-Grit wheels, and it will sharpen all your farm tools, mower sickles, too. A special attachment holds the sickle so that the bevel of each section fits against the flat side of the wheel. You simply move it along from section to section and keep pedaling. It's a lot easier than the old-fashioned way. And the real secret of it all is in the famous Dime-Grit wheels.

DIME-GRIT

What is Dime-Grit? Is it mined? No. Is it a kind of stone? No. Dime-Grit is made under the volcano like best of huge electric furnaces and nothing else like it has ever been made in any other way. It can't be a scientist discovered the process while trying to make artificial diamonds, and Dime-Grit has revolutionized tool sharpening, methods.

Would you like to try a Hammer yourself—to test the wonderful sharpening qualities of the famous Dime-Grit wheels? All right! Bring in one of your own dull tools—the duller the better, and see how quickly and easily the Hammer will put a keen cutting edge on it. Do it soon. When you see a Hammer work you'll be convinced.
