OSWEGO THEATRE A BLAZE

Idiot Yells "Fire" But Audience Keeps It's Head

Several hundred persons filed in safety out of the Capitol motion picture house in Oswego when fire broke out on the stage behind the screen. The blaze was confined to the rear of the house, near the heating plant, but for several moments it looked as if the whole building might be endangered. It was discovered by a man sitting near the stage.

Although he shouted "fire" at the top of his lungs and ran headlong for the exit the audience failed to become panic stricken.

ADAMS CHURCH BURNS.

The Methodist Episcopal Church here was entirely destroyed by fire which broke out at 3:15 o'clock Monday morning in the basement. The fire was discoverd by Mrs. E. J. Lavis, wife of the pastor, who saw the fire from her bedroom window in the parsonage next to the church. Efforts to sav the building were in-effectual, only the bible on the pulpit being saved by Mr. Lavis, who crossed the burning floor to get it. The loss, $18,300, was covered by insurance. The church was first built in 1852, was rebuilt in 1889 and a large addition was made to it in 1914.

NEW ENGLAND IN POOL

Farmers Of Several States Decide To Pool Their Product

What promises to be a step that will place the New England dairymen alongside of their brethren in the Dairymen's League territory in modern milk marketing methods was taken at the annual meeting of the New England Milk Producers' Association held in Boston on January 31st and February 1st, when the association voted to proceed to perfect a pooling plan similar to the one now in operation in the New York territory.

As a result of this disagreement over surplus milk between the New England association and the Whiting Company, which is one of the largest Boston dstributors, there is now a strike on with this company. This has served to bring the matter to a head and to convince the New York state farmers that the only solution to their surplus milk problem is in the pooling plan.

SELL OLD CHURCH.

The Presbyterian Church at Old Dekalb was sold at auction for $350 to Frank Decker of that place, a farmer. The church has not been used in some years and the St. Lawrence Presbytery decided to sell it. Title to the land on which it stands goes with the building, which is of wood. Mr. Decker's plans are not announced. A big crowd attended the sale, which was held at 1 p. m.

Heated Winds.

An intensely dry, hot wind called the "zonda," which blows down from the Andes upon the plains of Argentina, was formerly thought to owe its heat to volcanoes. It is really a "foehn," such as occurs in Switzerland and many other mountainous countries, where winds, robbed of their moisture in crossing the mountain, are heated by compression during their descent.

LIGHT-SIX SEDAN

See This New Low-Priced Sedan!

Two more cylinders make a world of difference.

You notice it when the LIGHT-SIX slows down to a snail's gait in traffic. You notice it when the open highway ahead invites the throttle. You notice it in the greater responsiveness, the greater flexibility, the greater s-m-o-o-t-h-n-e-s-s and in the absence of vibration.

There are new driving pleasures waiting for you in the Studebaker LIGHT-SIX Sedan.

Not only is its motor more powerful, more flexible and freer from vibration than any other light six-cylinder motor ever produced, but the perfect distribution of the car weight over all four wheels gives it unusual riding and driving qualities.

If you have been accustomed to driving a "four," the responsiveness of the LIGHT-SIX will be a revelation. If you are now driving another six-cylinder car, the lack of vibration and perfect balance of this LIGHT-SIX will create new standards of riding comfort.

But, equally important, is the new low price of $1750—an intrinsic value without parallel in the industry!
