

REAFFIRMS STAND ON STATE CONTROL

SNELL GIVES REASONS FOR OPPOSING COLLIER BEER BILL

Congressman B. H. Snell voted against the Collier beer bill because he was unwilling to vote to nullify the constitution, he stated in a letter to an Essex county constituent and published in the Lake Placid News last week. The local Representative reaffirms his stand for state control in the letter which follows:

"I did not vote for the Collier 3.2 by weight and 4% by volume Beer Bill for the simple reason that I could not bring myself to vote to nullify the present Constitution. The hearings before the Ways and Means Committee showed conclusively that 4% beer was intoxicating and it was practically the same beer that was served before the prohibition amendment came into existence. Colonel Ruppel made his statement that I see practically the same beer that was served before prohibition and entirely satisfactory to the brewers.

"I have tried to be consistent in my position that I think this whole matter should be referred back to

the states and for that reason I voted for the resolution to be submitted to the states for ratification but I think it would be a serious mistake for Congress to go on record approving nullification, although there is no doubt in my mind but what the beer bill will be passed.

As a matter of fact, the only way to approach this whole matter in a sensible, reasonable way is to give the states an opportunity to repeal the same and return the entire control back to the states. Then there will be no nullification or anything else and each state can handle its liquor problem as its own citizens desire.

"Very truly yours,
"Bert Snell."

PRELIMINARY REGENTS

Schedule of Examinations At The Junior High

Regents examinations in preliminary subjects will be given January 23 to 25th inclusive as follows:

Monday a. m. Geography. Monday p. m. arithmetic.

Tuesday a. m. Elementary English. Tuesday p. m. No examination.

Wednesday a. m. U. S. History. Wednesday p. m. Spelling and Science.

Pupils report on later than 9 a. m. and 1 p. m. for forenoon and afternoon examinations respectively.

Elem. Algebra, 9th grade, comes on Monday morning and General Science and Biology on Tuesday afternoon.

HEADS CLARKSON

(Continued from page 1)
ments for the acceptance of graduates, a constitutional amendment had been put through the legislature and passed by the people permitting local taxation for schools, (prior to this time 25% of all school monies came from direct appropriation by the State) the local tax had been voted in 63 of the 67 counties in the State, and in practically every school district in these 63 counties. The amount of money spent on education in Alabama rose from some \$4,000,000 in 1912 to about \$28,000,000 in 1931.

He served as president of the State Y. M. C. A., president of the Alabama Sunday School Association and Alabama Association of Colleges; was honored for the first good roads bond issue of \$25,000,000, and spoke an average of three times each day for sixty days, when the issue was passed with the largest majority ever known for any bond issue in Alabama.

In 1919 he secured the passage of an appropriation for the creating of the first General Extension Division for the University of Alabama. This was the first extension division to be established in any University in the South. He became director of the Division, with the rank of a dean of the University. In ten years, he built up the Division to where it had 4,000 correspondence students, 3,000 more regularly enrolled in Extension Centers where they were being met weekly by regular members of the faculty of the University; had enrolled some 6,000 women in club study work without university credit, conducted short courses in salesmanship in all the principal cities of the state by using experts in this line and made social surveys of various kinds.

From the beginning, the appropriation was small, amounting to only \$7,500 in 1919, the first year. In spite of this, he balanced the budget from the first, and when he resigned in 1929 the budget amounted to more than \$70,000, some \$50,000 of which was being collected in fees ranging from \$10 to \$30 per student.

In all of his connection with the University, he was considered the contact man with the public and the educational forces of the State. President Denny said of him in a public introduction in Birmingham that he had as much to do with building up the University as any man in Alabama. When he went to the University in 1912, the student body numbered a total enrollment of 375. When he resigned in 1929 the number had grown to 3,800. His work in building up the high school system, and in keeping in touch with the high school graduates had much to do in effecting this change. During the past eighteen years, he has made several hundred high school commencement addresses.

Since 1922, he has been economist for the Commonwealth and Southern Cottonseed in that capacity has traveled and lectured extensively throughout the East and South.

He is a member of Phi Beta Kappa, Kappa Delta Pi, the Sigma Chi Fraternity; is a past District Governor of Rotary International; served two years on the Boy's Work Committee of Rotary International; is a member of a number of national associations and all member of the Executive Committee of International Council of Religious Education.

His public work has given him an acquaintance that is far reaching. He is in touch with many agencies for social, religious, moral and economic betterment. His entire life has been conducted on definite principles and convictions about America and her institutions.

He is married, but has no children, having lost an only son who was sixteen years old at the time of his death.

PRESIDENT

DR. JAMES SHELBY THOMAS

LOCAL QUINTET LOSES

Town Team Drops Game To All-Ogdensburg

A Potsdam town team played an All-Ogdensburg quintet in that city Thursday night losing 35 to 6. The locals had things pretty much their own way during the initial period leading at the half 19 to 11 and 7 to 2 at the first quarter.

However, in the second Ogdensburg staged a rally which brought the score up to a tie at 21. Lenner for the locals again put Potsdam in the lead on a free throw but in the final quarter, Ogdensburg put the game on ice with 19 points against Potsdam's 4.

The locals will play Carthage at Carthage on Friday evening.

RADIO PROVING DEPARTMENT

Stromberg-Carlson Company Adds New Factory Feature

With the announcement of the establishment of a proving department by the Stromberg-Carlson Telephone Manufacturing Co., as an engineering department check on production, a new element enters the radio field according to George M. Sherburne, local Stromberg-Carlson dealer.

The automotive industry has long realized the value of proving grounds in the developments of its products, Mr. Sherburne says, and adds that this new department of the Stromberg-Carlson Company becomes one of the extremely few in the radio industry, if not the only one in existence.

"This proving department," he explains, "will have a two-fold purpose; to provide a final check on routine factory inspections by means of elaborate equipment not possible in the factory, and to assist in the development and improvement of Stromberg-Carlson products by subjecting new receivers to severe tests under actual operating conditions. Another part of the department's work will be the deliberate destruction of several sets each week picked at random from the production line just as automobiles are worn to pieces on the proving ground, in order to keep production up to specified quality.

"Thus," Mr. Sherburne concludes, "the proving department will stand behind every set made, keeping production up to specifications, insuring accurate tests and inspections and guaranteeing the purchaser perfect and long-lived radio enjoyment."

Portuguese Idea
Use of cane for chair seats and backs is supposed to have come from the Orient through Portugal.

Arm-chair Shoppers

Are skilful shoppers

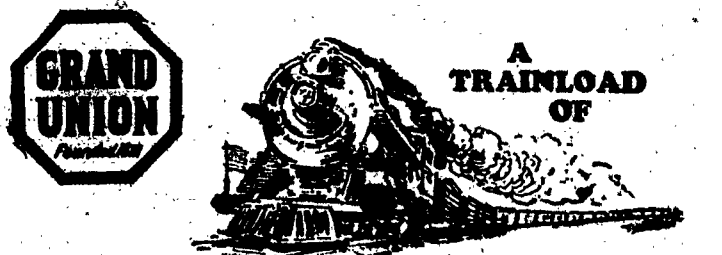

Almost every purchase you make represents a choice. And usually a wide choice, between three or four or forty good possibilities.

Be a good housekeeper today. Spend all her spare time on the go—comparing qualities, estimating values, trying to get the most for the money spent.

She does much of her shopping at home, with her weekly paper. She finds in the advertising columns a thousand remedies translated into real things to eat and wear and use and own. She makes up her mind before she goes out to buy.

Read the advertisements in The Courier and Freeman carefully. They bring you valuable information about new and better things. They show you how to have what you want and how to save money in buying.

Courier and Freeman Want and For Sale advertisements produce results. One cent a word, cash with order. No advertisements for less than 25 cents.

No. 39 Stromberg-Carlson

What a Radio MUST have to give SATISFACTION

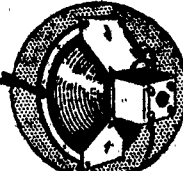

IT MUST look — worthy of the rest of your home. It must sound — perfect, beyond criticism. It must last — year after year. It must confer distinction — upon your home — because of the esteem its name commands.

Where can you find all these vital requirements of a radio set other than in a Stromberg-Carlson?

There are no radio cabinets more beautiful. No radio tone, admittedly, is more faultless. There is no other make of radio where every model since 1924 has served its owner so long and satisfactorily. And — no name in radio more promptly discourages comparison than Stromberg-Carlson.

METER FOR VISUAL TUNING. In a receiver with Automatic Volume Control, visual tuning is necessary. A highly sensitive, accurate meter such as is used in all Stromberg-Carlson is the best guide to the exact point for exact tones.

SPEAKER CONE WITH "EDGE SUSPENSION" OF ORGAN BELLOWS LEATHER. This type of edge suspension is costly, but has longer life and is more capable of correctly absorbing the vibrations at the edge of the cone than any other material, thus safeguarding the famous Stromberg-Carlson tone.

"There is nothing finer than a Stromberg-Carlson"
