

TECH FIVE DEFEATS S. L. U.

BEST SCARLET 30 TO 24 ON CANTON COURT

Clarkson College basketball team defeated St. Lawrence in Brewer Field House Canton, before a capacity crowd by the score of 30 to 24 and in downing the Scarlet the Engineers won their first basketball contest in 30 years from a Laurentian quintet.

The Larries played a good game throughout but the Engineers were better and the Potsdam boys proved they could keep up that grating, man-killing pace that the Canton five has been setting all winter with such signal success.

The Whippets found themselves blocked at every turn by the tall rangy Forbes, captain of the Tech five. Seidlecki, right forward and the lanky center, Flowers. The Engineers consistently got the jump on the Scarlet and made their shots count.

The pass work of both teams was of a high grade and the blocking also was highly commendable. But the speed of each outfit was the feature of the contest.

Captain Forbes was high point winner for the Engineers, scoring five field goals, while Flowers made eight and Seidlecki seven points for the visitors. Captain Gilligan played a whole of a game for the Scarlet Whippets, although LaBach had individual honors in points with eight.

Benjamin was second with six points. Flanagan, star forward, didn't have his usual good luck at the basket, although he tried hard and had to be content with a foul shot.

LaBach sent the ball through the laced hoops three times from the floor and added two more points from the free shooting line for a total of eight points.

TECH FROSH WIN AND LOSE

DEFEAT S. L. U. HERE BUT LOSE TO SYRACUSE AT WATERTOWN

Clarkson College freshmen basketball team broke even on two games last week, defeated S. L. U. freshmen 35 to 29 here Thursday and losing to Syracuse freshmen at Watertown Saturday 33 to 26.

Though they staged an offensive which netted them 10 points in less than three minutes of play at the close of the first half, St. Lawrence University freshmen were polished off by Clarkson frosh here Thursday night. The score was 35 to 29.

Three minutes before the close of the first half Clarkson was leading 22 to 7. It was then S. L. U. came thru with the best offensive of the game, scoring 10 points before the whistle ended the half with Clarkson leading 29 to 17.

In the final quarter Nichols and Ackley were removed for personal fouls as the game roughened up a bit and loss of these two men were felt by S. L. U. Gaffney and Cambridge of the winners performed well the former getting 11 points and Cambridge nine.

McGrieve, left guard for S. L. U. was outstanding on his team with four field goals and two free tosses.

The Syracuse Engineers dropped their game with Clarkson freshmen at Watertown high school court Saturday night 33 to 26. The Syracuse quint led through the entire game and it was not until the final quarter that the locals really reached their stride and then it was too late.

Score at the half was 15 to 8 and at the third quarter 23 to 14. Cambridge and Patterson were high scorers for Clarkson.

TECH GRADUATE CONVENTION SPEAKER

L. J. GORMAN IS SPEAKER AT I. E. E. CONVENTION THIS WEEK

At the winter convention of the I. E. E. to be held at New York from January 23 to 27, inclusive, a topic will be presented by H. C. Forbes and L. J. Gorman entitled, "Skin Effect in Rectangular Conductors," which is a method of measurement and experimental data.

Mr. Gorman, is a Clarkson graduate of the class of 1909. He was born in Lebanon and while attending college was affiliated with the O. P. I. O. fraternity. Upon graduation he entered the research department of the New York Edison Company, where he was advanced to superintendent in charge of research. He held that position until he offered his services to the Army Signal Corps at the time of the Great War. While in the service he was commissioned a captain and at the present time is a major in the New York Research of the Signal Corps.

Upon his release from active service in the army, he returned to the New York Edison Company, where he is presently employed as head in the research department.

Two other Clarkson men did previous work on this development before Mr. Gorman completed it. John Stiles of the class of 1928, and Stuart Rodgers of the class of 1930, both spent some time developing it when they were with the New York Edison Company. At present Mr. Stiles is a member of the Clarkson faculty in the electrical engineering department.

Example: Criticism should be suggestive, not arbitrary. Insistent advice may repeat rather than help. Personal example is more influential than many words. Advice gratuitously offered is seldom appreciated. A wise reticence is a safeguard against blunders. It is better to say too little than too much.—Grenville Kleiser.

FEDERAL INCOME TAXES

Inspector Will Be At Peoples Bank March First

For the convenience of those who are required by law to file federal income tax returns, a Deputy Collector of internal revenue will be at the Peoples Bank on March 1st to assist taxpayers in preparing their returns. No charge will be made for this service. The matter of filing your income tax return should be given immediate attention, in order to avoid penalty and interest.

If your net income is \$1,000 or over or your gross income is \$5,000 or over and you are single (or if married and not living with husband or wife), you are required to file a return. If you are married and living with husband or wife and your net income is \$2,500 or over or your gross income is \$5,000 or over, you are required to file a return.

Form 1040A should be used if the net income does not exceed \$5,000 and is derived chiefly from salaries and wages.

Form 1040 should be used for net incomes of more than \$5,000, or net incomes regardless of amount if you have a profession or business, including farming, or you own or have an interest in real property.

Your return for the calendar year 1932 shall be filed not later than March 15, 1933, with the collector of internal revenue for the district in which you reside or have your principal place of business.

A penalty of not more than \$10,000 or imprisonment for not more than one year, or both, and, in addition, 25 per cent of the amount of the tax, is imposed by the statute for willful failure to make return on time.

LOCALS LOSE

Collegians Drop Game At Carthage 42 To 18

The Collegians, local town team, dropped a game with the Carthage high school on the latter's court Friday evening, 42 to 18. Although somewhat one-sided, the game was fast enough.

For the locals, Anetia led the scoring with 7 points, all but one on field goals. Chaufy led for Carthage with 17, 10 of them field goals.

TRUCK KILLS BOY

Alphonse Is Hurt When Lads Are Struck Near Harrisville

Byron Hooper, 13, of Harrisville, was killed instantly and Earl Hooper, 21, his brother, was injured critically, when they were struck by a truck on the Natural Bridge highway a mile west of Harrisville early Sunday morning.

The injured boy was taken to his home two miles west of Harrisville. A physician said he was suffering from fractures of several ribs and possible internal injuries.

Lyle Phinney, 23, of Martin street road, Carthage, driver of the truck, was questioned by Corporal McCann and Trooper Revort.

The two boys left their farm home early in the evening and walked to Harrisville. They started back at about midnight. Half an hour later the truck driven by Phinney approached from the rear. In some way it struck both boys. Phinney took the injured youth home and notified a doctor.

CIVIL SERVICE EXAM

The U. S. Civil Service Commission has announced an open competitive examination for filling the position of freeman-laborer in the custodian service, Potsdam. Applicants must have reached their twentieth but not their fifty-fifth birthday on the date of the close of receipt of applications, provided, however, that eligible 50 years or over will be certified only in case no eligibles less than 50 years of age are available. Applications may be obtained from the Secretary, Board U. S. Civil Service Examiners, Post Office, Potsdam.

Card of Thanks

We wish to thank our friends and neighbors for their kindness and sympathy shown us at the death of our relative, Mrs. Baynard Baker. Maynard Baker, Mrs. Joseph Courchaine, Edmund Courchaine, Mr. and Mrs. John Paryen, Mr. and Mrs. Ralph Courchaine, Mr. and Mrs. Charles Feltus.

Craig Chevrolet Company

OLDSMOBILE • CHEVROLET DEALER

announces

the First Public Showing of the NEW OLDSMOBILE 6 and 8

STYLE LEADERS FOR 1933

THE NEW SIX

THE NEW EIGHT

We take great pleasure in announcing our appointment as dealer for the Oldsmobile 6 and 8 in this community.

These two new style leaders for 1933—a roomier, more powerful Oldsmobile Six at \$745, and a larger, more luxurious Eight at \$845—are now on display at our salesrooms, where we cordially invite you to see them and have a demonstration.

They are entirely different from anything you ever saw. New Fisher bodies—radiators—lamps—hoods. New fenders and wheels. New rear contours. Everywhere, a striking new smartness that would win acclaim at double the price.

And with all this style appeal, the 1933 Oldsmobiles are brilliant, dependable performers, greatly advanced in engineering. Both the 80 h. p. Six engine and the 90 h. p. Straight Eight engine are cradled in rubber with a three-point mounting of new scientific design, making these inherently smooth power plants still quieter and smoother throughout the entire speed range. Fisher No Draft Ventilation, Individually Controlled, beyond question the greatest contribution to comfort, health and safety since the introduction of the closed body, is built into all 1933 Oldsmobile closed cars.

In addition to our display of the new Oldsmobiles, we invite you to inspect our facilities for servicing Oldsmobile cars. Our service department is already stocked with genuine Oldsmobile parts and equipped with factory-approved machines and tools, in charge of expert mechanics, assuring a high standard of prompt, efficient service. We will also continue to provide Chevrolet owners with the same complete service they have enjoyed in the past.

See the new Oldsmobiles at your earliest convenience, and arrange a trial ride for a demonstration of the balanced excellence now available in these cars, at the lowest prices in ten years—\$745 and up, f. o. b. Lansing—bumpers and spare tire extra.

TWO GENERAL MOTORS VALUES

Oxford College First Library to "Circulate"

It is difficult to say who was the originator of the circulating library. There was a public library in ancient Athens and one in ancient Rome in the time of Augustus; it appears that books were occasionally borrowed from the Roman library. Chambers' Book of Days mentions an early lending library in the reign of Henry IV (about the year 1400) in Durham college, Oxford; the rules permitted the loaning of books from this library to students not belonging to the particular college, who gave security of sufficient value. The first free library in England was either Cheetham's library in Manchester, established in 1638, or one founded in Bristol by Redwood in 1615. In this country Benjamin Franklin in 1731 founded the first public subscription library in Philadelphia. His idea may have come from a custom of English booksellers of circulating books for a small charge. Two American booksellers, John Mein, of Boston, and Gerrit Noel, of New York, had large collections of fiction and travel as early as 1765, issuing catalogues of their books and charging 28 shillings a year for this service. The free public circulating library as an institution dates only from the Nineteenth century.

Officials Forgot Duty in Fear of Pestilence

The plague in London in 1665 was the poor man's plague, for the wealthy deserted the city. They followed the best preventive then known, which was administered in three adverbial pills—quick, far and late. That is, go quick, go far and return late. The nobility and officials followed this advice thoroughly. The city courts were closed, and the prisoners died in the jails. The sole representative of the government of King Charles who remained in London was the duke of Albemarle. It was during this epidemic that the apothecaries of the city won everlasting respect from the people; they refused to leave their shops and continued to dispense remedies even though many physicians deserted the city.—Dr. Howard Haggard in "The Lane, the Halt and the Blind."

Blessedness is Duty

In all situations there is a duty, and our highest blessedness lies in doing it.—Caryle.

Bird Destroys Peas

The secretary bird is native in South America and frequently is domesticated and kept to destroy vipers, lizards and other reptiles. The same is due to the crest, which resembles a pen stuck behind an ear.

NOT ENOUGH LIGHT

but her eyes won't tell her until the damage is done...

Has your child really enough light when she studies? It's easy enough to tell. Just slip a larger bulb into her reading lamp, and see the difference!

United States Public Health Service figures show that one school child out of every five has defective vision. And tests prove that poor light is one of the principal causes of eye strain.

Check the lamps in your house right now. Wherever you find a bulb that isn't giving enough light, replace it at once with a new Mazda bulb from the nearest lamp counter! Chart shows correct sizes.

One cent's worth of electricity will light a 60-watt lamp for over 3 hours.

ST. LAWRENCE COUNTY UTILITIES
Market St., Potsdam, N. Y. Phone 26

NIAGARA HUDSON

100-WATTS
For large, single-socket reading lamps, also kitchen, laundry.

60-WATTS
For two-socket and small single socket reading lamps.

40-WATTS
For triple-socket reading lamps, also wall and ceiling lights.

"Oblates"
An oblate in the Roman Catholic church is one who, not being a professed monk or friar, has either in youth been offered or in adult youth has dedicated himself to the service of God in holy religion. There are orders of many orders. Those of St. Francis are perhaps the best known.

Airbrake's Inventor
The airbrake was invented by George Westinghouse, Jr., in 1869. This was known as the straight airbrake. Objections to this led him to invent in 1873 the automatic-airbrake. In 1887 he invented the quick-action triple-valve brake, and in 1897 he placed on the market the high-speed brake.

Marriage of Cousins
It is now generally considered that there is no reason why first cousins should not marry, if there are no serious traits in their common heritage. Cousins marriage is among the most ancient of problems. Some early tribes forbade it, while others made it almost compulsory.—Washington Star.
