Girl's Leg Broken As Truck Wheel Passes Over It

Dorothy LaPoint, 7-year old daughter of Mr. and Mrs. Stanley LaPoint, Francis street, Potsdam, is in the Potsdam hospital suffering from a broken right thigh bone sustained in an accident last Wednesday evening.

The child was "hitching" a ride on the running board of a truck operated by Mrs. Frances Larabee, also of Francis street. She had warned the girl to stay off the truck. In attempting to get on the truck, the LaPoint girl caught hold of the door handle and the door opened.

The swinging motion of the door threw her off balance and she slid under the truck. Before Mrs. Larabee could stop the vehicle, the rear wheel passed over the leg of the girl.

The girl was taken to Potsdam hospital, where she was placed under the care of Drs. William J. Baldwin and Lloyd T. McNulty. The fracture was reduced Thursday.

friends, and through them, old acquaintances were heard from.

Mr. Buck shows no sign of letting up, or sitting down to relax. He has five tenants in his three "To Let" houses, his premises are kept "ship-shape," he is interested in all good causes, attends church regularly, comes over town three times a day for mail, and has a host of friends who will wish him "Happy Birthday." We take off our hat, to this all around man, who has been the "good neighbor" in Winthrop for 41 years.

"I know you'd like me in your home. I'd be happy too. But without a central switchboard I'd be no good to you."

Every telephone installed in a home must be connected to a central office switchboard—for it is only by means of the switchboard, and other complex central office equipment, that your telephone can be connected with all the other telephones.

And it is the lack of such equipment—and not just telephone instruments—that is the main reason why we have to ask people to wait for telephone service.

Our problem of switchboard shortages is twofold. Even when the factories, now almost wholly engaged in making war materials, resume large-scale peacetime production, it will take time to produce the amount of this complicated telephone apparatus needed, and still more time to fit it into the existing telephone system.

Of this we are sure: As soon as equipment can be made available, no time will be lost in catching up with orders for home telephones—and all orders will be filled in their proper turn.
