Places \$4.91 Price On December Milk

New York — A uniform price of \$4.91 a hundredweight (46.5 quarts) will be paid to dairy farmers for their December deliveries to 429 pool-approved plants in the six-state New York milkshed, it was announced here today by Dr. C. J. Sanford, market administrator of the New York metropolitan milk marketing area.

The uniform price in November was \$5.09 a hundredweight and in December a year ago \$4.29.

At the same time the market administrator announced that the producer differential for December would be 5.4 cents

Seeks Proposals On Amendment For Class III Milk

New York — Additional proposals for the amendment of existing provisions of New York's "federal and state milk marketing orders relative to transportation differentials and the pricing and classification of Class III milk were invited today by Dr. C. J. Sanford, marketing administrator of the New York metropolitan milk marketing area.

At the hearing, Dr. Sanford was informed, additional evidence will be permitted on issues involved in a recommended decision published last May. The recommended decision was based on evidence given at a public hearing held in January and February, 1950, at Elmira, N. Y., on similar proposals.

Dr. Sanford said that all proposals relative to transportation differentials and the pricing and classification of Class III milk which any interested party may wish to submit should be mailed in quadruplicate to the Market Administrator, 205 East 42 St., New York 17, N. Y., not later than Friday, Jan. 26.

For each tenth of a pound of fat above or below the 3.5 percent standard. Dr. Sanford reported that total fluid milk consumption last month was the highest for any December since the federal-state marketing orders were established in late 1938. Totaling 304,923,523 pounds, fluid sales showed a gain from a year ago of 20,145,540 pounds, or 7.07 percent.

In December, 1949 fluid sales accounted for 284,777,983 pounds, while the previous December high was reached in 1945 with 301,484,380 pounds.
