### THE TWO AND A QUARTER PERCENT RATE TO DEPOSITORS

The report to corporators a year ago summarized the policy of this institution with regard to interest, in these words: "The Burlington Savings Bank has always maintained that a generous and stable rate of interest to depositors is most likely to encourage the practice of thrift. It believes the saver should normally be able to count on the amount of return which his savings will bring. Accordingly, this Bank has aimed to pay year in and year out the highest rate of interest to depositors for the longest period. Thus, throughout the war years and the depression years which preceded the war, it has never allowed interest paid depositors to drop below an unconditional two percent per annum, even when it stood almost alone in paying that rate." The decision of the Bank's Trustees last June to raise the rate of interest to two and a quarter percent per annum resulted from the conviction that the Bank's earnings made a two and a quarter percent rate just and appropriate and gave sufficient assurance of its being continued.

## Long-term Investment that pays daily dividends

THESE days thoughtful people turn their minds to the durability of things they purchase. But it's rare when doing your duty turns out to be the best way to satisfy your heart's desire. That's what's so marvelous about this '51 Buick. If you picked a car just for the lift it gives you—your pride in its power—or its generous comfort—you couldn't make a better choice. But make note of this: That gleaming new push-bar forefront, which greets your eye with flashing beauty, contains 25 grille bars made of stamped steel, individually mounted to "give" and come back unharmed. Combined with a massive, wrap-around bumper, fortified by two stalwart "bumper bombs" and two added uprights, it gives unsurpassed protection. Springs of stout spiraled steel on all four wheels let your wheels curtsy over bumps, while you ride level as a lance. But they also need no servicing, and breakage is virtually unknown. Buick's great-powered engine is a Fireball, wondrously lively and eager at the mere touch of your toe—but it also wrings extra power from every drop of fuel, and has the mechanical perfection

that comes only from years of experience with this basic design. Dynaflo Drive gives you effortless smoothness of control—but it also eliminates clutch repair bills, saves tires, eases strain on the whole driving mechanism, from engine to differential. The road-steady gait of a Buick assures relaxed security—and is also evidence that you have a durable, deep-silled, X-braced frame beneath you. However you check it, you'll discover this: The things that make you yearn for a Buick on first acquaintance, are the very same things that make Buick such a smart long-time buy. Better see your Buick dealer—soon.

Standard equipment, accessories and trim illustrated are subject to change without notice.
