January Milk Priced at \$4.85

New York — A uniform price of \$4.85 a hundredweight (46.5 quarts) will be paid to dairy farmers for their January deliveries to 428 pool-approved plants in the six-state New York milkshed, it was announced yesterday by Dr. C. J. Blanford, market administrator of the New York metropolitan milk marketing area. The uniform price in December was \$4.91 a hundredweight, and in January a year ago, \$3.91 a hundredweight.

At the same time the Market Administrator announced that the producer butterfat differential for January would be 5.0 cents for each tenth of a pound of fat above or below the 3.5 percent standard. Total fluid milk consumption last month, Dr. Blanford reported,

was the second-highest for January on record, exceeded only by that in the peak year of 1946. Gaining 11,587,909 pounds, or 4.01 percent, from a year ago, fluid sales last month rose to 300,915,367 pounds. In January, 1950, fluid uses accounted for 289,327,458 pounds. The all-time high for the month is 306,702,690 pounds.

The Market Administrator said that more than 85 percent of the increase in fluid consumption from a year ago was due to higher sales of fluid milk from the New York milkshed to non-federally regulated markets. Sales in these areas, principally upstate New York and northern New Jersey, totaled 39,769,694 pounds last month, the heaviest volume for January since 1948. The gain from January, 1950, sales of 29,815,819 pounds was 9,953,875 pounds, or 33.48 percent.
