

National Fraternity Officers Install KKT As Theta Chi Chapter in Rites Saturday

The first Clarkson College social fraternity to "go national" will be installed Saturday as Delta Sigma Chapter of Theta Chi, a national fraternity with 109 other chapters.

The installation ceremony which makes Kappa Kappa Tau, formerly an independent like the other four Clarkson social fraternities, a Theta Chi chapter will be held in the KKT quarters on Fall Island at 2 p. m. Saturday. A banquet follows at the Arlington Inn at 6 p. m.

Kappa Kappa Tau officers have invited the general public, both local residents and persons connected with the college, to an open house in the Fall Island fraternity house from 9-12 Saturday night.

Regional Officers Attend

The installation committee will consist of the following national officers, Earl D. Rhodes, chairman; George B. Callender, vice chairman and counselor of region two; Fred J. Holl, deputy, region two; George W. Chapman, executive director; and James Hunt, field secretary. Kappa Kappa Tau's president, Lester E. Campbell of Hornell, will also be on this committee together with a member from the Theta Chi chapter at each of the following colleges: Norwich University, Colgate, Cornell, New York University, University of Rochester, Middlebury College, University of Buffalo and University of Vermont.

Kappa Kappa Tau alumni and Theta Chi alumni in the Potsdam area will also attend the installation ceremonies and the banquet.

Theta Chi fraternity was founded in 1856 at Norwich University by two students.

Joins National Conference

In 1912, Theta Chi became a member of the National Interfraternity Conference and it has become one of the eight largest fraternities in the conference. At present, it has over 33,000 members and annually pledges over 2,000 students. Because of its high membership standards, Theta Chi is among the top five fraternities in scholastic averages in the nation.

Theta Chi has divided the nation into 16 regions and Clarkson College is located in region two. Among the other colleges with Theta Chi chapters in the region are University of Rochester, Cornell, Colgate, Syracuse, Rensselaer Polytechnic Institute, New York University and University of Buffalo.

Study Nationals

The new chapter had its beginning in 1949 when Kappa Kappa Tau was founded by Richard March, Chester Kendell, Herman Steinborn, Vaughn Weid, M. Alan Chapman, Frederick Lattanzi and Donald Decker. These students felt the need of a national fraternity on the campus and formed Kappa Kappa Tau with the expressed desire to become a chapter of a national. Since its founding, its members have studied several national and early this semester petitioned Theta Chi.

Charles W. Minners of Ridgewood, N. J. and Joseph A. Valentine, Cortland, have been in charge of a committee studying national fraternities.

Kappa Kappa Tau has grown in size to 26 alumni, 45 active members, and 34 pledges.

The officers of the new chapter of Theta Chi will be Lester E. Campbell Jr. Hornell, president; Richard W. Burns, Watertown, vice president; John J. Marshall, Hempstead, recording secretary; David R. Burns, Watertown, corresponding secretary; Donald S. Batcheler, Oswego, alumni secretary; Fred Hohmann, Putnam Val-

ley, treasurer; Herbert V. Johnson, Cedarhurst, assistant treasurer; Frank A. Westburg, Rochester, first guard; John P. Badger, Bruchston, second guard; Raymond I. Malthouse, Poughkeepsie, chairman; Fred A. Emmerling, Rochester, Marshal; Robert W. Amidon, Syracuse, librarian; Conrad R. Hoffman, Glens Falls, house manager, and Charles M. Cogan, Manhasset, historian.

Star Observers Gather on Friday

Final plans are now being completed for the 41st spring meeting of the American Association of Variable Star Observers which will be held at Clarkson College Friday and Saturday. Prof. F. H. Reynolds of the college's chemical engineering department and a member of the AAVSO announced the program recently.

The meeting officially gets underway at 3 p. m. Friday when the council of the association meets in the Physics Building lounge for a business session. That evening at 8 o'clock in the Physics auditorium Prof. Frank A. Record, chairman of the Clarkson department of electrical engineering, will deliver an address entitled "Radio, Radar and Electronics and Their Application to Astronomy." Following Professor Record's talk, John J. Ruiz, Danemora, will demonstrate a Kron type photoelectric photometer using Professor Reynolds' 10-inch reflector type telescope. The Kron photometer is a newly developed electronic device which permits determination of the brightness of stars with an accuracy about 100 times as great as can be done visually.

Sessions Begin

On Saturday morning the technical sessions will begin in the physics auditorium immediately following an address of welcome to the association by Dr. William G. Van Note, president of the college. The technical papers will be concerned mainly with matters pertaining to variable star astronomy and related topics.

Mrs. Margaret W. Mayall, recorder of the association and its Pickering memorial astronomer, will give a paper on "Notes on Some Variable Stars." Mrs. Mayall is a member of the staff of the Harvard College Observatory. Another paper is to be given by Neale J. Heines, past president of the AAVSO and chairman of the solar division. It is entitled "The Coming Sun-Spot Minimum."

The meeting will end Saturday night with a banquet at the Albion Hotel.

Professor Reynolds said Monday that astronomers from the Yorkes Observatory at Williams Bay, Wis., the Dominion Observatory at Ottawa, Ont., and Harvard College Observatory are expected to attend as well as a number of amateur astronomers from various parts of the United States and their guests.

Sandstone Unit to Learn Of Pictures, Cooperation

Mrs. Shelly Stebner will give a lesson on pictures in the home tonight to members of the Sandstone Home Bureau Unit at the home of Mrs. Shelly Stebner.

The unit will be given a lesson on cooperation in the family on May 27 at the home of Mrs. Hilda Vandenberg, Bagdad Rd. Mrs. Hazel Hitchcock will teach this lesson.

POTSDAM HIGH-LIGHTS

by JUDY LOWE

"The time has come the walrus said,
Of shoes and ships and sealing wax
An cabbages and kings."

To think of many things,
Of shoes and ships and sealing wax
An cabbages and kings."

The time has also come for the seniors to think about college for next fall. Dave Parmele, Dale Smith and Bob Buck are all set to enter Clarkson in September. Dick Kendall is leaving New York State to attend the Massachusetts Institute of Technology. Each week more and more seniors are receiving acceptances from colleges. Some are looking forward to college life while others sort of hate to leave high school.

This week's baseball schedule is quite heavy. On Tuesday Northwood-Norfolk Central School played here at 4 p. m. The Saranac game which was postponed last Friday because of rain was played yesterday. The third game of the week is at Malone on Friday. That's a lot of baseball for one week. Let's hope that the weather man is in a good mood. Next Tuesday the traditional rivals, Canton and PHS, meet on the LeRoy St. field. In a game last week PHS downed St. Lawrence Central, 6-4.

All the classes are making lavish plans for the forthcoming class day which arrives May 29, a week from today. Each skit is allowed 15 minutes. The committee for the frosh is composed of the homeroom representatives. Those on the sophomore committee are Rose Dokianos, Barbara LaBarge, Alma LaBarge, Don Campbell and Ronnie Trippany. The junior committee is taking care of their skit and the same is true with the seniors. This year's skits should top those given previously because the emphasis is on student participation.

The juniors are at it again. They are having another food sale this Saturday in the St. Lawrence Electrical Appliances store. Drop in and look the food over. (Buy tool)

Ever since the yearbooks came out, a week ago last Monday, the school has been a madhouse. A continuous stream of "Will you sign my book" is heard from 8:30 to 3:30. Mrs. Stevenson, advisor, and the yearbook staff are to be commended for the exceptionally fine Sandstone. This book took months of work, but it was worth it in the end. The 1952 Sandstone is dedicated to Charles Turcotte, teacher of social studies and math. Some pictures have already been taken for next year's book. There's nothing like getting started early.

The library has just received approximately 60 new pocket books which include classic fiction,

sports and animal stories. These books are a mighty nice source of book reports.

There seems to be more class news this week. This item concerns the juniors. After waiting very patiently for nine weeks, the juniors received their class rings last Friday. The rings come in four different sizes and various patterns. Inside each ring is the owner's initials. The class officers have their names engraved fully on the inside. Everyone seems satisfied with them.

By attending an unexpected assembly last Wednesday, we didn't have eighth period classes. Gordon Goodyear, public relations man from the New York Telephone Company, gave a very interesting talk on telephones from their beginning to the very modern phones. It was interesting and well received by all.

The track meet last Saturday was a rather sad affair with Potsdam losing by a large margin against Gouverneur. Next week they go to Ogdensburg for the second league meet of the season. How about turning the tables with a win?

All the students met with their guidance teachers last Friday to discuss courtesy and subject difficulties troubling the students. Each faculty member has about 20 students to check up on.

Bertie Sherman got together a gang of kids and had a hayride last Friday night. This is more the weather to have one than in the dead of winter.

The hospital has seen a number of high school students lately. Tom McManus has been there for quite a while with an infected jaw. Isa Bernal had an appendectomy just last Wednesday. Tom Sullivan returned to school last Friday after a stay there.

The tea for the charter members of the National Honorary Society of Secondary Schools turned out very successfully. One must have been on the honor roll three times and carry at least four subjects to be admitted. Sophomores are probationary members and are voted in when juniors. On class day certificates are given to these members and seniors wear a little golden key at commencement. Every year in March the society gives a nation-wide exam for members. The top 50 participants are awarded cash prizes for college scholarships.

These are the charter members of our chapter: Margaret Adams, Rose Aldrich, Mary Brownell, Nancy Cook, Barbara Dodds, Rose Dokianos, Marion Doyle, Ann

B's Home Bureau to Learn About Pictures in Home

Potsdam B's Home Bureau Unit will learn about pictures in the home from Mrs. Myron Mochel Tuesday evening, May 27, at 7:30 p. m. in the civic center.

Members have been asked to bring pictures suitable for framing to the meeting.

A short business meeting will follow the lesson. Memberships can be renewed then.

The unit will end its year's activities with a picnic on June 11. The program will start again in September.

Grace, Louise Grace and Richard Kendall.

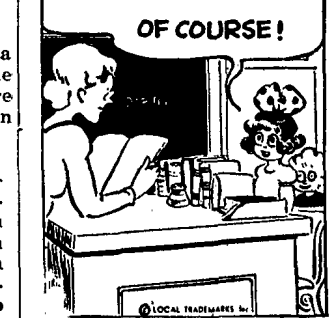

Also Alma LaBarge Judy Lowe, Ann Manfred, Ken Mochel, Lois Mundy, Lorraine Page, David Parmele, David Pattison, Jacqueline Pierce and Norma Pike.

Also Robert Plum, Ann Robinson, Jean Rockwell, Shirley Russell, Janice Selleck, Dale Smith, Gale Stillman, Darrell Williams, and Ann Watkins.

Here's a news item of interest to school goers. No school next Friday because of Memorial Day! Don't shout so. That will be the last vacation before (ugh) exams. I don't like the word anymore than you, but we've got to face them. See you next week.
