

James Tracy Named Technical Superintendent At N-E Plant

James Tracy, formerly technical control supervisor at Nekoosa-Edwards, Wis., has been named technical superintendent at the Potsdam Plant, replacing Russell K. Elston.

A 1960 graduate of University of Wisconsin chemical engineering, Tracy joined Nekoosa-Edwards that same year, assuming his last position in 1961.

Elston has been named to the newly created position of superintendent, manufacturing technical services for Nekoosa-Edwards Paper Co., with headquarters in Port Edwards, Wis.

He will direct all pulp and paper control testing for the three mills operated by the company and, in addition, will be responsible for process engineering required for operations improvement and control, working out of the Port Edwards offices. He has been located at the Potsdam mill since 1957.

Troop 57 To Sell Popcorn On May 21

A popcorn sale is planned for May 21, with the Scouts of Troop 57, Potsdam, to sell it about town. With the cooperation of the fire department, Scoutmaster Cy Gotham's boys will peddle popcorn from door to door from 6 to 9 p.m.

The proceeds of the sale are to assist in the financing of new equipment for the troop. Some of the old equipment is past repair, and funds are needed badly to re-stock the troop for its summer activities.

So far, the troop has gone on three camping trips this spring, including an overnight in the woods near Hannawa Falls. Among other activities, the troop plans to spend its third consecutive summer at Site Three in BSA camp Vigor-Of-The-Woods. Boys planning to make the trip with them are urged to sign up as soon as possible.

The popcorn sale next Thursday is being made possible through the assistance of the fire department, which has agreed to loan the troop a number of vehicles. Scoutmaster Gotham urges everyone in the area to help the troop, and notes Casey Stengle to the effect that "Nobody doesn't eat popcorn."

Deaf Man Perfects Midget Transistor Hearing Aid

If you can hear people talk and can't make out the words clearly then this will be your answer. An extremely small hearing aid, using a tiny energized unit, has been perfected by a man who himself is hard of hearing and has been for over 10 years. With this new aid, even whispers are crystal clear and your closest friends will never know how you hear so perfectly. If interested, it is suggested you write "HEARING," 32 East 9th St., Erie, Pa., you will receive all information at no cost or obligation whatsoever.—Adv.

Even the sturdiest stepladder will let you down — hard — if you misuse it. A ladder is safer than a box or a chair for climbing jobs, but it's not accident-proof, reminds the St. Lawrence County Extension Service.

Balance on any ladder is all important. Most fall victims lose their balance by overreaching or leaning too far backward. So rather than take a risk, take a minute to move the ladder.

As you climb, steady your balance by keeping one hand free to hold the ladder. And if you're overly tired or are prone to dizzy spells, save the climbing jobs for someone stronger.
