Volkswagen, incognito.

You'd have to be some kind of a car sleuth to know that concealed underneath the Karmann Ghia's beautiful exterior is the heart of a VW.

The Ghia's chassis and the 4-speed synchromesh transmission are the same as the regular VW's.

Behind every Ghia is one of VW's won't-boil-over-or-freeze-up engines.

You also get VW's big 15-inch wheels; the very ones that help VW bugs rack up 40,000 and more miles on a set of tires.

The Ghia's torsion bar suspension is all Volkswagen, too. Not to mention the traction and gas-and-oil economy and low insurance and parts and service, etc.

What aren't typically Volkswagen are the Ghia's sleek lines, the handwrought body, the noble Roman nose.

If you're one of those people who admire everything about the VW except the way it looks, why not consider driving around in a beautiful disguise?
