

Student Recruiting Begins Soon on Clarkson Campus

The annual campus talent hunt for next June's graduates from Clarkson College of Technology will begin Oct. 17, according to F.A. Ramsdell, director of placement at the college.

Ramsdell said that 41 employers from 22 states and the District of Columbia will send representatives to Clarkson during the recruiting period, which will run into March 1968. "Virtually every conceivable type of business operation will interview here," said Ramsdell.

It is the placement director's

task to accommodate the talent seekers—a task not always free from burdon. On some dates, up to 15 employers will be represented on campus by one or more interviewers, creating a space problem for Ramsdell.

"We have 10 rooms set aside upstairs in Snell Hall for interview purposes," said Ramsdell, "but quite often I have had to run up and down the main floor looking for empty offices. On more than one occasion we've had to ask visitors to set up shop across the

street in either the Potsdam Civic Center or the Sunday School room of the Baptist Church."

Ramsdell said that scheduled employer visits to Clarkson were running about 25 ahead of last year at this same time and that more are coming in every day. During the 1967 academic year 374 different employers conducted 4,000 interviews; which means that the average graduate of last June's 330-member senior class talked to 11 different recruiters.

The University of Rochest-

er's College of Business will launch the recruiting season on Oct. 17. Rochester, seeking promising candidates for advanced degrees in business, is the only organization booked that day.

However, the rush begins the very next week, with no less than 14 business firms scheduled at present to visit the Clarkson campus Oct. 23 to 25—some for as long as four days.

Apparently, November and February are the most popular recruiting months. Rams-

dell's list of campus visits for November runs almost three typewritten pages in length, and the list for February is almost as long.

It includes, besides two or three educational institutions, blue chip companies, government agencies, civil service organizations, military departments, research firms, and civic agencies.

Two of the auto industry's "big three"—Chrysler Corp. and General Motors—will send representatives to Clarkson early in December, while the Ford Motor Company is book-

ed for the first week in February. All three are interested in graduates of the college's programs in accounting, industrial management, electrical, chemical and mechanical engineering, industrial distribution and physics and chemistry.

The City of Detroit will visit Clarkson twice—in December and again in March—in search of accountants, economists, engineers and mathematicians. In mid-February, the City of Los Angeles will make a pitch for civil engineers.

Without even glancing at

his tally sheet, Ramsdell named company after company, month by month, which would set up headquarters somewhere on the Clarkson campus this year.

"Next month," he said, "we will host Procter and Gamble, Sherman Williams, Bethlehem Steel, Crouse-Hinds of Syracuse, General Foods, Scott Paper, Reynolds Metals, U.S. Steel, and DuPont. Just to name a few."

The companies he listed for visits during the following five months were just as familiar and just as impressive in name

Campus Comments

CCT's Enrollment Climbs

Clarkson College of Technology has announced a record enrollment of 2,575 students for the 1967-68 academic year, its 72nd.

The total includes an all-time high of 730 freshmen. In addition to the freshmen class, Clarkson's enrollment is comprised of 602 sophomores, 550 juniors and 495 seniors.

The undergraduate total of 2,368 adds up to 177 more students than the comparable enrollment in 1966. In the past two academic years, Clarkson's student body has grown by 353 undergraduates.

Graduate student enrollment for the fall semester has reached 204—more than double the figure of two years ago. Some 104 graduate students are studying chemistry, mathematics or physics in the college's School of Science; 79 are registered in the School of Engineering, and the remaining 21 are candidates for advanced degrees in the School of Business Administration.

On the undergraduate level, Clarkson's School of Engineering, with 1,364 students, leads by far other fields of study.

The college's department of industrial distribution ranks second in undergraduate enrollment with 383 students, followed by the School of Science with 321, the School of Business Administration with 225, and the School of Humanities and Social Sciences with 75 students.

Four members of the Crane department of music faculty

at the State University College at Potsdam presented a public recital yesterday evening in the College Theater.

Organist James Autenrieth and baritone Richard Griffith were assisted during the program by Helen King, piano, and Donald Macdonald, flute. Selections included works by Bach, Mozart, Verdi, Scarlatti, Vaughan Williams, Lubeck and Mahler.

ATC Enrollment At Record Figure

Canton - Enrollment this year at the State University and Technical College at Canton reached a record figure of 1,263 students, an increase of 224 over the previous year. It is expected that late registrants will raise the final count to approximately 1,275 according to Dean of Students, Hugh A. Quinn.

Part of the increase was accounted for by the addition of a new Nursery Education curriculum which attracted 46 freshmen women.

Freshmen began arriving last Sunday following a delay in school opening to sign in at the new campus dormitories. A meeting for parents and get-acquainted parties in the dorms were part of the day's activities.

A breakdown of enrollment statistics shows 522 freshmen men and 246 freshmen women for a total of 768 freshmen. Senior men number 369, and senior women 116, for a total of 485 seniors.

St. Lawrence to Host Workshop For Area Elementary Teachers

The St. Lawrence County Conservation Education Committee will conduct its second annual conservation workshop for elementary teachers within the county next Thursday on the St. Lawrence University campus.

According to Dr. John I. Green, chairman of the committee and associate professor of biology at St. Lawrence, the workshop is designed to help elementary teachers become better acquainted with the teaching and understanding of conservation.

The teachers will meet from

4 to 9 p.m. in Atwood Hall where they will attend lectures and discussions on forestry, soil, water and wildlife conservation.

The county committee is composed of several agencies and institutions including the Wildlife and Forestry Divisions of the State Conservation Department, the Cooperative Extension Service and Soil Conservation District of St. Lawrence County, the J. S. Agricultural Stabilization and Conservation Commission, Canton Agricultural and Technical College and St. Lawrence University.

earliest available Hungarian books, dating from the 11th century.

Dr. Brunauer then covers the Codex literature of the middle ages and the lyric poetry of the Renaissance, as well as the epic poetry which flourished during the transition period.

She also traces the beginnings of serious drama and fiction up to 1825.

Dr. Brunauer was recently selected to moderate a weekly college seminar concerning current and historical problems in religion to be held at 9:45 each Sunday at the social room of the First Baptist Church. The seminar is open to all college students and faculty, regardless of faith.

Dr. Hultberg To Participate In Conference

Dr. W. Earl Hultberg, member of the Crane department of music faculty at the State University College at Potsdam, will participate in a conference for committee members of the Faculty Senate of the State University of New York, to be held tomorrow through Sunday in Lak George Village.

Dr. Hultberg is a member of the committee on undergraduate education of the Faculty Senate, which is charged with analyzing directions of undergraduate education within the university.

Resumes Studies

Capt. William C. Lewis was recently released from active duty after serving seven years in the Air Force, as an electronic warfare officer with the Strategic Air Command's B-52 Fleet.

He has returned to Clarkson College at Potsdam where he is studying for a degree in electrical engineering.

He with his wife, the former Miss Barbara Powers, daughter of Mr. and Mrs. Lawrence Powers, Potsdam, and three children, Lynn, Lauren, and Lee, are residing at 21 Cheshnut St.

Capt. Lewis is a nephew of Mrs. Earl H. Stickney of Brookdale.

Charles Lahey Plans 2 Talks

Dr. W. Charles Lahey, professor of history at the State University College at Potsdam, will fill two speaking engagements Monday concerning the new social studies curriculum now in use in public schools within the state.

Dr. Lahey, pioneer of the discovery approach to teaching social studies that is an integral part of the new curriculum, will address participants in the Southwestern Zone conference of the New York State Teachers Association Monday morning at St. Bonaventure University, Olean.

That afternoon, he will discuss and demonstrate the discovery method at a meeting of teachers in the Pittsford school system, to be held at Pittsford High School.

MEETING CANCELLED

The "Open Door" meeting scheduled this Saturday has been cancelled, according to a joint announcement made by the New York State Defense Commission and the St. Lawrence County Civil Defense Office.

FENDER FIXERS — These seven members of the Body and Fender Repair class at the Manpower Training and Development Center have earned that title as a result of work they have completed during their 36 week course. They are shown here with one of their projects, the Morrisstown Rescue Squad ambulance. That's the instructor, Terry LaFleur of Norwood, in the driver's seat. The men have fixed fenders, as well as replaced glass and repainted the two ambulances of the Pots-

dam Rescue Squad, the Madrid Rescue Squad ambulance, and a Boy Scout truck of Camp Vigor. The class will graduate Sept. 28. From left, Lynn LeFleur of Rensselaer Falls, Chester Griswold of Massena, Dewey Garrow of Rooseveltville, LaFleur, Malcolm Smith of Potsdam, Wayne Gardner of Ogdensburg, Albert Hull of Gouverneur, and Roy Denesha of Ogdensburg.

MADRID UF COMMITTEE — The Madrid Area United Fund Campaign Committee met last week for a briefing at the library in Madrid. The area campaign, with a \$1,400 goal, is now in progress. From left seated are Mil-

Wants Port Study

Waddington — Mayor R. Bruce Pemberton of the Village of Waddington today announced that he has requested a feasibility study for the development of a port at Waddington.

In a letter to the area director for the Economic Development Administration, the mayor stated that due to increased interest, local and area, and recent inquiries by two international shipping concerns who indicated their interest in utilizing the local facility for loading and discharging commodities other than wood pulp, he felt it was the duty of his office to explore the possibility and request that such a study be made.

The mayor further stated that such a development would create more employment, increase business for the Norwood-St. Lawrence railroad, and would place our community in a level of progressive competition for world import export trade.

Heads Madrid UF Drive

Madrid — The Madrid Area United Fund drive for the St. Lawrence County United Fund Campaign is once more being headed by Mrs. Charles Cryderman in an attempt to achieve 100 percent of their goal for the second year in a row.

Last year marked the first 100 percent goal in the newly organized Madrid Area Campaign with a total of over \$1,200 raised. The goal in the current drive is \$1,400 and the countywide goal is \$275,000.

Madrid is one of seven smaller county communities under the overall leadership of the Rev. Jack Wells of Potsdam. Others include Waddington, Morrisstown, Henkelton, Tri Town (Brasher, Winthrop, and N. Lawrence), Hammond, and Hermon-DeKalb.

Mrs. Cryderman will be assisted in various divisions by the following persons: Charles Goolden, residential chairman; Glenn Rourke, rural

Prof at Clarkson Co - Authors Book

Dr. William W. Bradley, an associate professor of civil engineering at Clarkson College of Technology, is the co-author of a 735-page book on the control of corrosion of metals through the use of protective coatings.

The volume, "Protective Coatings for Metals," third edition, was written by Bradley in collaboration with Dr. Robert M. Burns, scientific advisor for the Stanford Research Institute. Bradley and Burns also wrote the second edition, published in 1955.

"Of all the factors involved in corrosion control," Bradley explained, "none has been more important to industry than the widespread use of protective anti-corrosive coatings. Our monograph provides for all who use or manufacture metals and metal products the latest data on all types of metallic and organic application, and evaluation."

The authors, who consulted some 2,500 references in preparing the text, worked on the manuscript for more than three years. Bradley said the book is designed to fully meet the needs of corrosion and construction engineers, metallurgists, paint technologists, and chemists.

Contemplate Water Study

Public hearings will be held today in Malone and Canton to determine whether or not it is in the public interest to undertake a regional water resources planning and development study in the St. Lawrence River drainage basin.

To Form Speech, Hearing Group

An organizational meeting of the northern New York Speech and Hearing Association will be tomorrow in Massena.

Prof to Speak In Schenectady

Willard I. Musser, professor of music at the State University College at Potsdam, will speak tomorrow at the New York State Teachers Association meeting in Schenectady for approximately 350 teachers in the Capital District area.

A past president of the New York State School Music Association, Musser will discuss the current state of music in New York.

ELECTED PRESIDENT OF SIGMA DELTA CHI — Charles W. Kelly, editor of the Advance News and managing editor of the Ogdensburg Journal, was elected president of the St. Lawrence Valley Chapter Sigma Delta Chi, professional journalists, at a meeting held at the Tick Tock Restaurant, Canton, Thursday evening. In the above photo, Kelly receives gavel from Outgoing President Thurlow Cannon, who is director of public information for St. Lawrence University. Looking on at left is Jack Morris, publisher, Prescott Journal, Prescott, Ont., who is vice president of Sigma Delta Chi. Morris is also president of the International Conference of Weekly Newspaper Editors, which will hold a meeting shortly in Canada. At right is Philip C. King, editor, Potsdam Courier and Freeman, secretary-treasurer. Lawrence Roy, publisher, Thousand Island Sun, second vice president, was absent when the photo was taken.
