

### Potsdam Humane Society Notes

By Judy Araja and Pat Crist  
**LOWER-COST NEUTER SPAY**  
 The Potsdam Humane Society wants to help you neuter or spay your pet, if you need help. We have a lower-cost neuter-spay program now in operation for those in financial need. All surgery performed by licensed veterinarians. For information and appointments call 265-4228.

**PURINA WT. CIRCLES**  
 Don't forget to save your Purina weight circles and send them to Pat Crist, Bayside Lodge, Clarkson Ave., Potsdam. We can use weight circles from any of the Purina Dog Chows, Purina Cat Chow, and Meow Mix.

**COMMON PET PROBLEMS**  
 When an animal is dropped off at the Potsdam Animal Shelter, a variety of explanations are given by owners who no longer want their pets. "Barks too much, chews everything, digs up flowers, still not housebroken, cats too much, and jumps on people" are reasons used for dogs. Reasons for cats include "scratches furniture, jumps on table or counter, yowls at night, gets into fights, scratches children, not housebroken, too many kittens." Pet owners fail to realize that most or all of these problems can be easily remedied. When a child does something unacceptable, the parent thinks of a way to solve the problem and uses it. He does not simply throw up his hands in defeat and turn the child over to an adoption agency! The same rationale applies to pets.

Excessive barking by a dog is easily controlled by a water pistol or empty squeeze detergent bottle filled with water. When the dog barks for no good reason (they can be expected to bark at an intruder in your home but not at every bird, bicycle, car, etc. that passes by!), you walk out to the dog, squirt water in his face and say, "NO!" firmly with the dog's name. The dog will like the fact that you walk out every time he barks, but will not like this strange new "watergame" you are playing with him. Patience and consistency are required for this painless "cure" and remember it takes about four days for the average dog to learn the average thing.

The water method also works for cats who jump on tables and other places where they are not to be. Do remember, however, that cats have a strong perching instinct, so provide at least one acceptable high place for your cat to escape to. When you have an acceptable "perch" for your cat, you can squirt him for being on the table or whatever, then immediately transfer him to his place. He will soon get the idea. By the way, water guns are better for in-house training; detergent bottles for outdoors. Do not use anything but water in the containers. Other substances, such as ammonia can hurt or burn the animal.

Cats have to scratch. They have a thick cuticle-like substance which grows over the nails. This substance becomes uncomfortable and must be removed. Imagine how you would feel if your cuticle grew out over your nail. Humans rid themselves of cuticle by doing dishes, getting a manicure, etc. Cats rid themselves of cuticle by scratching on something, too often your best chair or rug. To avoid this provide a scratching log for your cat. Take an ordinary log with thick bark, lay it on its side (you can mount it on 2 little boards so it won't roll) and put in a place where your cat frequently visits. Right by his food and water dish is a good place. If you catch him shredding your furniture, pick him up, say NO firmly and place him immediately on his log. He'll get the knack of where he should and should not scratch in no time. Cats and dogs do not need to be hit. Hands are for petting, not hitting.

Carpet covered logs are not a good idea. Cats cannot tell the difference between the carpet on the log and the carpet on the floor or any heavy upholstery fabric, for that matter. Besides, wood logs are free and "stone bought" carpet logs are usually relatively expensive.

Next week we will discuss housebreaking your cat or dog...the right way and the wrong way.  
 Potsdam Humane Society Animal Shelter Hours  
 Monday through Saturday morning 9 a.m. to 10:30 a.m.  
 Monday through Thursday evening 6 p.m. to 8 p.m.
