BADMOUTH OR SWEETMOUTH?

I know it's not a pleasant subject, but halitosis is a fact of human life. It is not a disease, but a sign that something is happening in your mouth. It might be as simple as the natural action of saliva on bits of food or as serious as tooth decay, gum disease or even the symptom of a more serious disease.

Bits of food left in the mouth, is by far, the most common cause. Food debris gets caught in any number of places in the mouth, mixes with bacteria and the product is "bad breath". Onions, garlic, alcohol and tobacco, by their nature, can also cause foul breath. Cavities (which are food traps for bacteria), tartar buildup, and poorly-fitting dentures are also common causes of halitosis.

What can you do about halitosis? It's a simple, two-pronged approach: dental appointments on a regular basis and regular home care for your teeth. The dentist will fill the cavities, remove the tartar, and make sure the bridges and dentures fit. A proper brushing and flossing regimen is the key to your personal dental hygiene! Between brushings, rinse your mouth to dislodge food particles. Be a "sweetmouth".
